WHO WE ARE

ABNIA Environmental Consultants (ABNIA) is an environmental management consulting company established in 2009. Since its inception, it has continually striving to be a leader in the sector by offering high-level expertise to its customers and contributing to improve the quality of the environment where we all live.

Innovative, tailor-made solutions, leadership, and transparency underpin our work, with a drive for long-term and sustainable development. We work with clients who share our vision and values, and this extends into our projects, resulting in service solutions that benefit people and their communities.

ABNIA was established as a subsidiary company in the environmental consultancy market with a strong professional and experienced team, specialized in fields such as environmental studies, water and wastewater management, waste management, renewable energies, and sustainability, having worked for both government and private organizations.

OUR MISSION

To satisfy our clients' needs by providing them with services and technologies of the highest quality, in the shortest possible time and at the lowest possible cost, all in compliance with the local and international standards and regulations.

OUR VISION

To be the leading environmental services provider in the region.

WHY US

We constantly aim to be at the forefront of delivering innovative, inspiring and sustainable solutions that set new standards and make a genuine difference to our clients, the environment and society as a whole. We do this as a matter of professional pride, and a genuine passion for the environment but also because it is our success to see how people and organizations are positively impacted by the value we have added to them.

OUR APPROACH

Good communication is integral to the way we work, we study and understand complex environmental issues, provide expertise and sound reports, and often represent our clients in front of regulators and other stakeholders. Our approach is client-oriented, underpinned by strong project management, stakeholder engagement, and effective communication. In addition to that, we acknowledge that our solutions depend on the creativity, insight and integrity of our team of people to ensure a sustainable environment. Therefore, we empower people within our organization, welcome individual creativity and talent, and create specialized multi-tasks teams.

OUR VISION

Our organizational core values revolve around five pillars :-

- ENTHUSIASM
- INNOVATION
- AMBITION
- COMMITMENT
- CREDIBILITY

OUR TEAM

Our team consists of scientists, specialists and engineers with extensive experience in different environmental related matters, who continually work with all kind of stakeholders: developers, industry professionals, regulators, and other relevant authorities.

The Team is involved with clients from the earliest stages of a project making the best use of their scientific understanding and experience to make it successful. We combine advanced technical expertise with regulatory and commercial expertise, developing solutions that satisfy our clients while improving the environment around us.
